

**Synthetic Expression:** In this exercise, you formulate and express what you've been listening to, to reinforce learning. Please wait to complete this until asked. This is not a test, and won't be collected.

Work Individually. Name each normative philosophy, state its metaethical basis, and express it in one sentence. Is it deontological (rule) or teleological (consequence)?

Do as much as possible on your own. Then ask for reminders to complete the rest.

Don't transcribe. Express your own understanding.
